Minutes20071206

MTU LUG meeting Minutes December 6th, 2007

Package Manager for PCLinuxOS
command? it uses apt but is RPM based

Server Status
Quicksilver has leaking capacitors
migrating to new hardware
Maybe spending time after finals are done
hardware back from minerva - but not tested
SCSI backplane might of been loose... now seems fine and is rebuilding

Rack Status
All the stuff to do it except the rails for the drive arrays
Craus wants the rails for drive arrays first
the racks they have aren't sturdy enough
we were donated $500 by a Alumni so we can pay for all this stuff (base_16)
All our us belong to Base_16

New Mirrors
we have crap tons of space
Imhotep - 500G and 218G
Athena - 826G
Suggestions:
OpenBSD - 153G, or as little as 60G
GNU.org 40G
kernel.org 144G
VIM?
Mozilla -all 2.2T -releases 140G
Slackware
DSL?

Wemcab for rtlinux/vxworks
what works?
USB something doesn't automatically work with every OS
rtlinux != vxworks

Shirts?
next week

END
